

Magnus One *Superior bottom loading cooler*

The Magnus One redefines our range with a bold, all-black design that delivers a sleek, modern look unlike any of our other coolers. As a bottom loading unit, the water bottle is discreetly housed inside the lower front cabinet, making installation easier while maintaining a clean, premium appearance that your customers will love.

Key Features

Effortless Bottom Loading

Simply slide the bottle into place with no lifting or straining required. The Magnus One also features an empty bottle indicator which flashes when the bottle is empty.

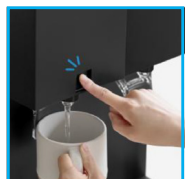

Hygienic Design

The Magnus One is built with a hygienic stainless steel suction pipe. This reduces secondary contamination risks whilst remaining simple and easy to clean.

Built-in Safety Features

For maximum protection and security, the Magnus One features a hot water safety lock to ensure peace of mind, especially in environments near or around children.

Quiet Operation

Low noise circulation pump allows seamless use in quiet places. Ideal for corporate and customer facing spaces.

Contemporary Design

Stylish blacked out design that blends effortlessly into any modern interior space. A machine that not only performs well, but looks good whilst it's doing it.
