

3300X

Our Legacy Cooler

A reliable cooler that has the ability to dispense hot water. The 3300X was the first cooler made using our iconic design, which has since featured on the ArcticStar 55, 108 and 109 coolers. Elevate your hydration experience with optional upgrades like the SIP self-sanitising device, surpassing customer expectations. Integrated cup dispenser comes as standard on floor standing models.

- 14cm dispense height
- Dispenses ambient, 20ltrs/h of chilled, and 5ltrs/h of hot water
- Traditional paddle taps with safety lock feature for hot water
- Compatible with Sip automatic sanitising device
- Overflow kits & mains drainage options available
- Available bottled or POU
- Optional integrated cup dispenser on lower front panel

Accessories

Installation Rail & Filter

Includes compression fitting, 1-micron green filter, water block, copper pressure reducing valve & non-return valve.

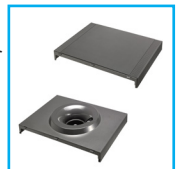

Sip Neo3

An automatic sanitising device compatible with floor standing, tank fed POU coolers. Reduces sanitising visits and saves your customers money on electricity.

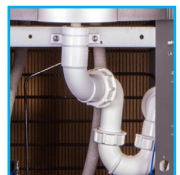

Conversion Kits

Easily convert your 3300X cooler to bottled or tabletop to suit your customers preference. We offer conversion kits for AA coolers for full control of your offering.

Mains Drainage

Connect the drip tray to mains drainage. Can also be supplied with pumped waste if mains drainage is not available.
