

WA5

High Capacity Wall Mounted Boiler

A wall mounted boiler that keeps countertop spaces free and delivers up to 186 cups of boiling water per hour. Durable and reliable stainless steel body that by nature, has a varying dispense height depending on where it is installed. We recommend installing this boiler over a draining board or a work top fitted drip tray. Compatible with a touch free adaptor which eliminates the risk of touch contamination.

- Variable dispense height depending on installation
- 31ltrs/h of hot water (186 cups)
- Conventional lever for easy operation
- High grade insulation for maximum efficiency
- Polished stainless steel body is built to last
- 5ltr rapid draw off

Accessories

Installation Rail & Scale Filter

Includes one installation rail with all the fixtures and fittings, and one Brita C150 scale removal filter.

Scale Filters

Replacement Brita C150 scale removal filter. For use in hard water areas. Designed for hot water dispensers with large output capacities.

No Touch Adaptor

Allows for hygienic no contact dispensing. Eliminates any risk of touch contamination and is simple and easy to install.
